

WILD BOAR

FASCINATION „HUNTING IN ROMANIA“

The wild boar population in Romania is good and has a very high average weight due to harsh living conditions. The boars in Romania impress with very high body weights over 200 kilograms. An average trophy is 20 centimeters weapon length, with each year also significantly stronger trophies are imposed.

The targeted hunt for mature boars takes place mainly on Anstz on confirmed pieces. During the pressure hunt season, however, strong boars and non-conducting streams, defectors and newbies are also killed.

Recently, boars have been hunting all year round.
